Judging Criteria

Judging Criteria is applied to score the quality of the execution of each individual trick. Each judge analyses the following major elements when scoring a trick:

- Height and amplitude – The combination of height and amplitude of the tricks completed during the heat. As the wind conditions increase, this aspect will exponentially become more and more into consideration, but only when the height and amplitude are achieved along with risk factor and technical difficulty.
- Technical Difficulty – The technical difficulty of tricks completed during the heat.
- Power – The power during the execution of the tricks. Power will be considered as a combination of speed into the trick to pop and speed out during the landing, kite position, height and amplitude during the trick.
- Risk factor – The risk factor is directly linked to the power, height, amplitude and technical difficulty of the jump, but also to the commitment of the competitor and physical challenge during the execution, duration of the critical moment, and energy on the execution.
- Smoothness – Smoothness and fluidity during the execution and landing of tricks completed during the heat.

- **Innovation** – Performing completely new tricks from the trick list. To be called an 'innovation,' a trick must represent a distinct evolution from all the tricks listed. Tricks appearing in red are those that haven't been landed before in a competition. If any of these tricks are successfully landed, the judges will reward accordingly, taking all judging criteria and landing into consideration for the final score.

- Heelside group
- Variety group

Inside the "Heel side" group there are the following trick families:

- Raley or flat Based
- Slim & KGB
- Hintenbergers and Heart Attacks
- Mobes

Inside the "Variety" group there are the following trick families:

- Rewinds
- Toesides or blind sides
- Combos
- Double inverted rotations
- Kiteloops or Downloop handle passes.
